Design a webpage dedicated to the global efforts in safeguarding tiger sanctuaries. Explore and share information about conservation efforts globally and encapsulate your findings in a webpage. To accomplish this, follow the guidelines below:

Create an HTML document named assignment2.html. (**80% of mark**):

Introduce a captivating title, such as "Exploring Global Tiger Sanctuaries," using H3 format.

Incorporate a relevant image to form an aesthetically pleasing banner at the top of the webpage.

Introduction:

Craft an introductory paragraph shedding light on the significance of protected areas in today's context.

Hyperlinks:

Showcase a bulleted list containing six hyperlinks to websites that discuss pertinent issues and strategies related to protected areas.

Ensure each hyperlink is operational and directs users to the chosen webpage upon clicking.

Visual Enhancement:

Elevate the visual appeal by implementing a background color that complements the theme.

Font Style:

Utilize the Verdana font (or another Sans Serif font) consistently throughout the entire webpage.

HTML Comment:

Embed an HTML comment within your code, showcasing your name and student number.

Copyright Line:

Conclude the webpage with a copyright line at the bottom, including your student information, assignment details, and proper credits to acknowledge the sources of pictures and information.

Content Centering:

Ensure that the webpage content is centered within the browser window for a polished presentation.
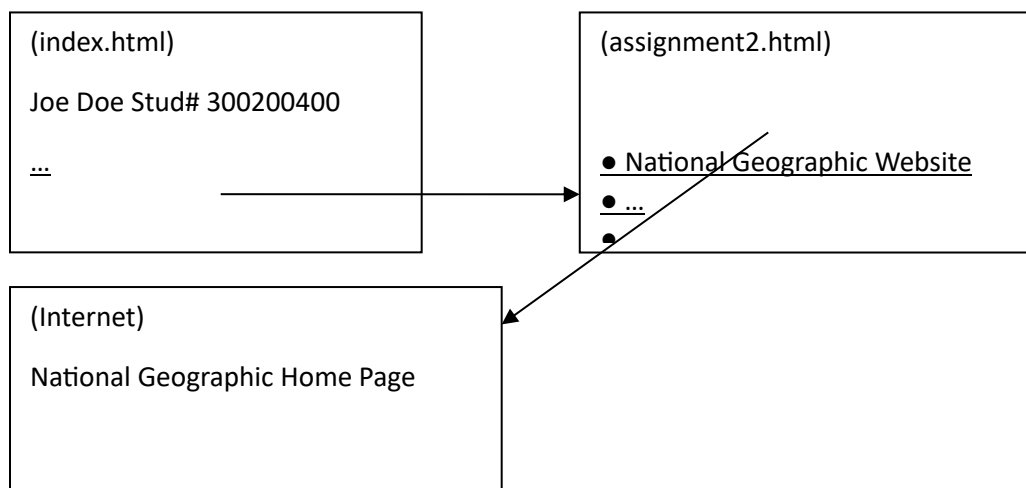

By adhering to these specifications, you'll be well on your way to creating an engaging and informative webpage on the crucial topic of world tiger sanctuaries and conservation efforts.

(20% of mark) You are encouraged to add additional features (e.g. additional pictures and text content, colored fonts, horizontal rulers, graphics bullets, etc.) to further enhance the content and visual appeal of assignment, according to your own creative skills.

Upload your assignment2.html file to the studentweb server and to Assignment2 drop box and modify your index.html file to contain a hyperlink to it as illustrated below.

(**20% of mark**) You are encouraged to add additional features (e.g. additional pictures and text content, colored fonts, horizontal rulers, graphics bullets, etc.) to further enhance the content and visual appeal of assignment, according to your own creative skills.

Upload your assignment2.html file to the studentweb server and to Assignment2 drop box and modify your index.html file to contain a hyperlink to it as illustrated below.

Late assignments are accepted two more days after the due date, and they are marked out of 80%.
